SE Vid transport kan skevhet uppstå. Krydsmät diagonalmättet. Vid justering. Placera en träkloss mot dörren och knacka försiktigt med en gummiklubba.

DK Under transport kan der opstå skævhed. Krydsmål den diagonale måling. Ved justering. Anbring en træklods mod døren, og bank forsigtigt med en gummihammer.

NO Under transport kan det oppstå skjevhet. Tverrmål den diagonale målingen. Ved justering. Plasser en trekloss mot døren og bank forsiktig med en gummiklubbe.

GB During transport, skew can occur. Cross measure the diagonal measurement. To adjust, place a wooden block against the door and tap gently with a rubber mallet.

FI Tuote voi taipua kuljetuksen aikana. Mittaa pituus kulmasta kulmaan. Suorista tuote asettamalla puukappale ovea vasten ja napauttamalla sitä kevyesti kumivasaralla.

- Rengör aluminiumprofilens yta med t.ex T-Röd innan handtaget sätts fast, ytan ska vara torr vid montering.
- Clean the surface of the aluminium profile before attaching the handle, the surface must be dry when mounting.
- Do not clean with anything that damages the paint or gives a greasy surface.

VIKTIGT! Handtaget behöver härda efter montering. Använd ej handtaget direkt. Låt handtaget härda i 24 timmar innan användning!

VIGTIG! Håndtaget skal hærde efter montering. Brug ikke håndtaget med det samme. Lad håndtaget hærde i 24 timer inden brug!

VIKTIG! Håndtaket må herdes etter montering. Ikke bruk håndtaket direkte. La håndtaket stivne i 24 timer før bruk!

IMPORTANT! The handle needs to harden after mounting. Do not use the handle immediately. Let the handle harden for 24 hours before use!

TÄRKEÄÄ! Kahvan on annettava kovettua asennuksen jälkeen. Älä käytä kahvaa heti. Kovettuminen kestää 24 tuntia!

28

Kontrollera alltid funktion och montering efter utfört arbete även om det utförts av utomstående installatör, innan de lämnar platsen. På det viset får ni en genomgång av produkten och dess funktion och skötsel.

Always check the function and installation after work has been carried out, even if it has been carried out by a third-party installer, before leaving the site. In this way, you get an overview of the product and its function and care.

Var akksam och se till så att partierna står stabilt placerat under tiden för monteringen, ett fallande parti kan orsaka skada på produkten eller orsaka skada på person och omgivning.

Be careful and make sure that the parts are stably placed during the assembly, a falling part can cause damage to the product or cause personal injury and damage to the surroundings.

Kontroll av funktion och skötsel.

Följande bör kontrolleras med regelbundenhet:

- Funktionen på dörrarna.
- Funktion på eventuella Lås.
- Gångjärn och hjul ska löpa lätt.
- Handtag vid öppning och stängning.
- Lister ska vara hela och rena.

Checking the function and maintenance.

The following should be checked regularly:

- The function of the doors.
- Function of any locks
- Hinges and wheels should operate smoothly.
- Handle when opening and closing.
- Mouldings must be intact and clean.

Viktigt om glas!

Stora ojämnheter i temperatur på delar av glaset kan skapa termisk spänning. Placera ej värmeelement mot glas eller värmefläkt som riktas direkt mot glaset då termiska spänningar i glaset kan uppstå och föranleda sprickbildning. Placera ej möbler, kuddar, dynor eller liknande mot glaset. Montera ej klistermärken som ej är avsedda för glas eller skyltar på glaset.

Important information about glass!

Large variations in temperature on parts of the glass can create thermal stress. Do not place heating elements against glass or heating fans that are directed directly at the glass as thermal stresses in the glass can occur and cause cracks to form. Do not place furniture, pillows, cushions or the like against the glass.

Do not apply stickers that are not intended for glass or signs on the glass.
